SWATHI VANNELADAS

AWS CERTIFIED JAVA FULL STACK DEVELOPER
- JPMORGAN CHASE &CO

8074077738 https://www.linkedin.com/in/swathi-vanneladas-0a4587209 swathivanneladas@gmail.com

PROFILE

Java Full-Stack Engineer with 2+ years of experience at JPMorgan Chase, building cloud-native, enterprise-scale platforms using Java, Spring Boot, React, AWS, and event-driven architecture. AWS Certified Cloud Practitioner with strong fundamentals in distributed systems, API design, and scalable architecture. Now seeking Software Engineer II roles to build high-impact, modern financial technology solutions.

WORK EXPERIENCE

Software Engineer I — JPMorgan Chase & Co **JUL 2024 -PRESENT**

Software Engineer Program (SEP) Intern — JPMorgan Chase & Co **JAN 2024-JUN 2024**

Project: Card Product Lifecycle

Working on Chase's enterprise-scale credit card product lifecycle system used by 1,500+ business and operations teams. Developed backend microservices using Java, Spring Boot, and REST APIs for product configuration and lifecycle automation. Contributed to microfrontends in React for product inventory, feature storefront, and lifecycle views. Improved API performance and streamlined product update workflows, reducing manual effort and operational load. Improved system performance through Redis cache optimization, enhanced logging, stronger unit test coverage using jest, and led resiliency testing. Contributed to Non-Functional Requirements (NFRs),built automated functional testing with Selenium and Cucumber. Supported EAC migration, and gained hands-on experience with DynamoDB. Awarded SEP recognition

Summer Internship — JP Morgan Chase & Co. **JUN 2023-JULY 2023**

Project: AI-based Placement Prediction Model

Selected through Code for Good 2022 Hackathon. Developed a machine learning model to predict company placement outcomes using historical student skill data from the college. Cleaned and preprocessed datasets containing academic scores, technical skills, and company hiring patterns. Implemented algorithms such as Logistic Regression, Random Forests, and KNN, evaluating performance using accuracy, precision, and F1-score. Created a streamlined pipeline for feature selection, training, validation, and deployment. Delivered insights to help identify key skills that influence placement success.

JP Morgan Chase & Co. Code for Good 2022 Hackathon (1 day) **SEP 2022**

Problem Statement:-

https://drive.google.com/file/d/1QNCIY3oyGBqhaAoQkiOdgxBto7SBfnS0/view?usp=sharing

Solution:-

We have come up with a web application to assist the Kotak education foundation (Digital learning solution) with tracking and assessing the outcomes in their DLS initiative. This web app makes use of PostgreSQL, ReactJS stack. Developed a centralized digital platform concept to replace manual data collection for KEF's 200+ partner schools in Mumbai. Streamlined beneficiary mapping (School → Teacher → Student) and structured multi-format data capture (audio, video, images, assessments). Designed key workflows for teacher surveys, attendance, submissions, analytics sessions, and post-test evaluations. Proposed automated metadata-driven impact tracking and one-click access to beneficiary history. Improved efficiency by replacing scattered storage (Google Drive, WhatsApp) with a unified, accessible Android-based solution.

EDUCATION

VALLURUPALLI NAGESWARA RAO VIGNANA JYOTHI INSTITUTE ENGINEERING AND TECHNOLOGY **2020-2024**

Bachelor of Technology in Electronics and Communication Engineering - 8.9 CGPA

SKILLS

Web Application Development
- React JS , Redux , Microfrontend
- Angular JS, Javascript , Typescript
- Jest , Node JS
- HTML5 , CSS 3, Bootstrap

Serverless Application Development
- Amazon DynamoDB ,AWS Lambda , Amazon API Gateway

REST API Development
- Java , Spring Boot , Spring Framework
- PostgreSQL

Automated Testing Frameworks
- Cucumber /Selenium/ JUnit /Mokito

DevOps and Continuous Integration and Continuous Deployment (CI/CD)
- Jenkins , Spinnaker

Infrastructure as code (IaC)
- Terraform

Postman , Github , Bitbucket
Agile and Scrum Methodologies
SOLID Design Principles , Data Structures

CERTIFICATIONS

- AWS Certified Cloud Practitioner — 2024
- Udemy — C Programming, Python Advanced, HTML5, CSS, JS
- Unschool — Data Science (Workshop)

ACHIEVEMENTS

- Finalist — JPMorgan Code for Good 2022
- Volunteered & mentored in multiple hackathons (Smart India Hackathon , College hackathons - IoT Sprint, Convergence contests)
